

When is a  
whiteboard  
not **just** a  
whiteboard?

# A whiteboard is not **just** a white

## 1 ...it's an Egan Whiteboard

Meet two very different Egan surfaces:  
**EganBoard Porcelain and EVS™**

### What is EganBoard Porcelain?

Since 1967, Egan Visual has developed a reputation for quality products. EganBoard Porcelain is our original whiteboard material that features a durable, off-white surface manufactured with a thick coating of porcelain, permanently fused to sheet metal.

### What is EVS?

Egan has developed an enhanced dry-erase surface with a matte-finish that is also perfectly suited for projection: EVS.

Unlike specialized projection screens, EVS provides a full 160° comfortable viewing angle (without hot spots or glare), without dimming the lights.

Combine this with superior dry-eraseability, in a variety of product offerings, and you have an extremely unique tool for generating and presenting ideas.

**EVS Lightweight** features EVS fused to a honeycomb core, resulting in an incredibly lightweight whiteboard.

**EVS Magnetic** features EVS fused to steel over a honeycomb core, to accept magnetic accessories.

**EVS Pro™** features the same properties as EVS with an enhanced projection surface. Note: Use EVS Pro with Egan Markers and the EganCloth only. Other markers can leave residue and ghosting which may require using EganBoard Cleaner to remove.

EVS is available on a variety of Egan products. Refer to current price and specification guides or visit [www.egan.com](http://www.egan.com) for details.

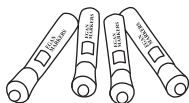

**EVS provides a full 160° comfortable viewing angle, without dimming the lights.**

**Egan guarantees extraordinary quality and performance.**

## 2 ...you use Egan Markers

**Egan Markers are guaranteed to clean on all Egan dry-erase whiteboard surfaces**

### How to use an Egan Marker

- Remove the cap to draw/write.
- Firmly replace the cap to extend marker life.
- Store markers horizontally.
- Take advantage of all 4 colors.
- Be creative with color and line widths.
- Use an EganCloth for dust-free whiteboarding, and to guarantee a clean surface every time.

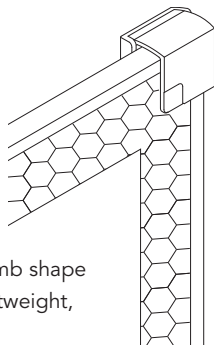

Use Egan Markers to draw/write on the EVS or EganBoard surface.

**MSDS Info:** Egan Markers contain no materials in sufficient quantities to be toxic or injurious to humans, or to cause acute or chronic health problems. The markers show conformance to quality standards and comply to ASTM D 4236 and the U.S. Labeling of Hazardous Art Materials Act (LHAMA).

### What is a 'Honeycomb' Core?

Recyclable paper products are formed into a 'honeycomb' shape to create an incredibly lightweight core.

Porcelain or EVS is fused to the core to create a whiteboard surface. The honeycomb shape provides strength, and insures a durable, lightweight, warp-free whiteboard.

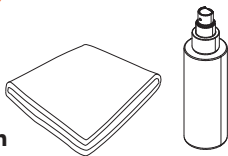

EganBoard porcelain and EVS are both guaranteed to clean under normal use. For best results, use Egan Markers and an EganCloth. Combine quality dry-erase writing tools with the amazing cleaning qualities of the EganCloth, for fantastic dust-free results.

A whiteboard is not **just** a whiteboard when...

### 3 ...you use an EganCloth®

**The guaranteed-to-clean,  
dust-free whiteboard solution:  
EVS + Egan Markers + EganCloth**

#### How to Use an EganCloth

- The EganCloth works best dry.
- Hold it any way that feels comfortable to wipe the board.
- When areas of the cloth become dirty, simply refold to expose clean, unused fabric.
- Dry-erase dust may appear on the cloth, but it will not transfer to your hands, clothing, walls or carpet, even after 100 uses.
- Occasional use of EganBoard Cleaner is recommended.
- Remove all dry-erase markings from the board with an EganCloth before applying EganBoard Cleaner.

Use the EganCloth to remove dry-erase markings.

The EganCloth traps dry-erase dust, keeping it on the cloth and off hands, clothing, walls and carpets.

Used a permanent marker by mistake? Take an Egan Marker, scribble over the permanent, wait a minute, then use an EganCloth to clean.

#### EganCloth Washing Tips

- Hand or machine wash the EganCloth in warm, soapy water.
- Do not use fabric softener.
- Laundered hundreds of times, EganCloth still retains original cleaning properties.
- Wash separately (microfiber will catch lint in the wash water, which could reduce the effectiveness of the cloth).
- Dry on regular tumble cycle.
